

MILESTONE 2: Core Functionalities Development

Activity 2.1: Develop the core functionalities

1. Legal Document Generation

Functionality: Generate legal documents (e.g., contracts, agreements) based on user inputs (document type, parties, terms, and dates).

2. Document Output Formatting

Functionality: Convert raw AI-generated text into structured .docx, .pdf, .txt files with legal formatting, logos, tables, and footers.

`format_docx(text, doc_type)`

`format_pdf(text, doc_type)` `format_html_preview(text)`

These use:

`docx` for Microsoft Word formatting (includes logo, Times New Roman font, terms as table, footer).

`fpdf` for clean, branded PDF documents with headers/footers.

HTML Preview with Streamlit styling.

3. User Interaction & Recommendations

Functionality: Accept user preferences through the Streamlit interface and reflect them in the AI-generated legal content.

4. Editable Document & Download

Functionality: Provides editable text area, allows download in .txt, .docx, .pdf formats.

Activity 2.2: Implement the FastAPI Backend

1. Define Routes in FastAPI (Instead of Flask)

2. Process User Input

Handled via Pydantic & Streamlit Forms:

3. Integrate Groq (Gemini) API Calls
